Prescribed Minimum Benefit (PMB) conditions

In terms of the Medical Schemes Act 131 of 1998 and its Regulations, all medical schemes have to cover the costs related to the diagnosis, treatment and care of:

- An emergency medical condition
- A defined list of 270 diagnoses
- A defined list of 27 chronic conditions

To access Prescribed Minimum Benefits, there are rules that apply:

- Your medical condition must qualify for cover and be part of the defined list of Prescribed Minimum Benefit conditions.
- The treatment needed must match the treatments in the defined benefits.
- You must use designated service providers (DSPs) in our network. This does not apply in emergencies. However, even in these cases, where appropriate and according to the rules of the Scheme, you may be transferred to a hospital or other service providers in our network once your condition has stabilised.

If your treatment doesn't meet the above criteria, we will pay up to 80% of the Discovery Health Rate (DHR). You will be responsible for the difference between what we pay and the actual cost of your treatment.

What is an emergency

An emergency medical condition, also referred to as an emergency, is the sudden and, at the time unexpected onset of a health condition that requires immediate medical and surgical treatment, where failure to provide medical or surgical treatment would result in serious impairment to bodily functions or serious dysfunction of a bodily organ or part or would place the person's life in serious jeopardy.

An emergency does not necessarily require a hospital admission. We may ask you for additional information to confirm the emergency.

What is the Discovery Health Rate (DHR)
